Case No. 17-cv-05948-SBA

BRIEF OF THE INSTITUTE FOR POLICY
INTEGRITY AT NEW YORK UNIVERSITY
SCHOOL OF LAW AS AMICUS CURIAE IN
SUPPORT OF PLAINTIFFS' MOTION FOR
SUMMARY JUDGMENT

Hearing: October 10, 2018

Time: 1:00 p.m.

Courtroom: TBD

Judge: Hon. Saundra Brown Armstrong

The Institute for Policy Integrity at New York University School of Law (“Policy Integrity”)¹ submits this brief as *amicus curiae* in support of plaintiffs’ motion for summary judgment seeking vacatur of the Office of Natural Resources Revenue’s (“ONRR”) decision to repeal the “Consolidated Federal Oil & Gas and Federal & Indian Coal Valuation Reform,” 81 Fed. Reg. 43,338 (July 1, 2016) (“Valuation Rule”) (AR 39-104). *See* “Repeal of Consolidated Federal Oil & Gas and Federal & Indian Coal Valuation Reform,” 82 Fed. Reg. 36,934 (Aug. 7, 2017) (“Repeal Rule”) (AR 10243-10298).

INTEREST OF AMICUS CURIAE

Policy Integrity is a nonpartisan, not-for-profit think tank dedicated to improving the quality of government decisionmaking through advocacy and scholarship in the fields of administrative law, economics, and public policy, with a particular focus on environmental and economic issues. An area of special concern for Policy Integrity is the proper valuation of the economic and environmental impacts of natural resource extraction. Policy Integrity consists of a team of legal and economic experts, trained in the estimation of costs and benefits and the application of economic principles to regulatory decisionmaking. Our director, Richard L. Revesz, has published more than eighty articles and books on environmental and administrative law, including several works that address the legal and economic principles that inform rational regulatory decisions.² Additionally, our policy director, Jayni Foley Hein, has written several articles and reports focused on natural resources management and conservation as well as valuation and royalties.³

In furtherance of its mission to promote rational decisionmaking, Policy Integrity has filed *amicus curiae* briefs addressing agency analysis of costs and benefits in many cases involving natural resource management. For example, in the U.S. Court of Appeals for the Tenth Circuit, Policy Integrity

¹ This brief does not purport to represent the views of New York University School of Law, if any. Policy Integrity states that no party's counsel authored this brief in whole or in part, and no party or party's counsel contributed money intended to fund the preparation or submission of this brief. No person—other than the amicus curiae, its members, or its counsel—contributed money intended to fund the preparation or submission of this brief.

² Richard L. Revesz, Publications, *available at* <https://its.law.nyu.edu/facultyprofiles/index.cfm?fuseaction=profile.publications&personid=20228>

³ Jayni Hein, Profile, <http://policyintegrity.org/jaynihein>.

1 filed a brief supporting a challenge to the Bureau of Land Management’s (“BLM”) approval of four
 2 coal leases in Wyoming’s Powder River Basin. The brief pointed to basic economic principles to show
 3 that BLM’s failure to consider the effect of additional coal leases on coal consumption was irrational.
 4 Br. for Inst. for Policy Integrity as *Amicus Curiae*, *WildEarth Guardians v. U.S. Bureau of Land*
 5 *Mgmt.*, 870 F.3d 1222, 1235 (10th Cir. 2017). The Tenth Circuit agreed that the agency had improperly
 6 failed to consider the extent to which increased mining would, by lowering the price of coal, lead to
 7 increased coal consumption. *WildEarth Guardians*, 870 F.3d at 1235.

8 In addition, Policy Integrity has filed amicus briefs critiquing agencies’ economic analyses for
 9 regulatory repeals and suspensions similar to the Repeal Rule at issue here. For example, in this
 10 district, Policy Integrity filed a brief opposing BLM’s decision to suspend a leak prevention rule
 11 without considering the rule’s forgone benefits. *See e.g.*, Br. for Inst. for Policy Integrity as *Amicus*
 12 *Curiae*, *California v. U.S. Bureau of Land Mgmt.*, 277 F. Supp. 3d 1106 (N.D. Cal. 2017) (Laporte,
 13 M.J.). In that case, the court agreed that BLM’s failure to consider the forgone benefits was arbitrary
 14 and capricious. *California*, 277 F. Supp. 3d at 1123.

15 Policy Integrity also has experience with the rules at issue here, having submitted comments
 16 to ONRR on both the proposed Valuation Rule⁴ and the proposed Repeal Rule.⁵ Policy Integrity’s
 17 expertise in cost-benefit analysis and experience with these rules give it a unique perspective from
 18 which to evaluate plaintiffs’ claims that the Repeal Rule is arbitrary and capricious.

19 SUMMARY OF ARGUMENT

20 As plaintiffs have explained, ONRR does not provide an adequate explanation for repealing
 21 the Valuation Rule. Plaintiffs’ Memorandum of Points and Authorities at 17 (“States’ Br.”);
 22 Conservation Group’s Proposed Memorandum in Support of Motion at 8 (“Conservation Groups’
 23

24

25 ⁴ *See, e.g.*, Institute Policy Integrity Comments on ONRR’s Proposed Reform of Consolidated
 26 Federal Oil and Gas and Federal and Indian Coal Valuation Rule (May 8, 2015). Website urls for these
 27 documents are provided in the table of authorities.

28 ⁵ Institute for Policy Integrity Comments on ONRR’s Proposed Repeal of Consolidated
 29 Federal Oil and Gas and Federal and Indian Coal Valuation Reform Rule (May 4, 2017) (AR 6750-
 6751).

1 Br.”). That lack of an adequate explanation is particularly apparent in the agency’s analysis of the
 2 costs and benefits of the Repeal Rule, as well as in ONRR’s claim that repealing and replacing is less
 3 expensive than maintaining the Valuation Rule while working to fix asserted “defects” in the rule.
 4 This amicus brief thus focuses specifically and uniquely on those issues.

5 ONRR’s assessment of the Repeal Rule’s costs and benefits is fundamentally flawed in at least
 6 two respects. First, the agency fails to acknowledge the forgone benefits of the repeal. In issuing the
 7 Valuation Rule, ONRR found that the rule would provide net benefits to society by reducing the
 8 administrative costs associated with valuing mineral resources. By forgoing those savings, the Repeal
 9 Rule imposes net costs. Rather than justify that loss in the Repeal Rule, ONRR obscures its impact by
 10 claiming that the royalty savings make up for the higher administrative costs. But ONRR’s task is to
 11 determine whether *society* will be better off as a result of repeal, not whether *industry* will be better
 12 off. And from that perspective, any money that industry saves in lower royalty payments is money that
 13 federal and state taxpayers lose by not receiving those same payments. Thus, those royalty savings
 14 cannot offset the administrative costs imposed by the Repeal Rule.

15 Second, ONRR fails to assess the potential health and environmental costs of repeal. In the
 16 Repeal Rule, the agency claims that the Valuation Rule would have led to decreased fossil fuel
 17 production. But if that is true, then it necessarily follows that the Repeal Rule will lead to an increase
 18 in production. ONRR’s failure to acknowledge the health and environmental harms that will flow from
 19 that increased production is arbitrary and capricious.

20 In addition to preparing an inadequate cost-benefit analysis, ONRR provides poor justifications
 21 for reversing the Valuation Rule’s reforms to the royalty calculation process. Those reforms would
 22 have ensured that states and the federal government receive the full value of royalties due under the
 23 law. ONRR is required to explain its decision to reverse course. But rather than provide any
 24 justification for depriving states and the federal government of this revenue, ONRR claims that
 25 “defects” in the Valuation Rule make the rule difficult to implement. According to ONRR, repealing
 26 the rule and later issuing a replacement is cheaper than maintaining the rule while fixing the defects.
 27 82 Fed. Reg. at 36,940. But the defects ONRR cites do not seem that costly to fix through an
 28 amendment or simple guidance document. ONRR is not permitted to deprive the federal government

1 and states of significant revenues with such conclusory claims. Moreover, ONRR’s justifications for
 2 repeal rely heavily on claims of uncertainty regarding the Valuation Rule’s implementation—
 3 uncertainty that exists, at least in part, because the agency illegally stayed the Valuation Rule six
 4 months before repeal. Allowing ONRR to rely on that uncertainty would improperly reward the agency
 5 for taking an illegal action. For all these reasons, the Repeal Rule should be vacated.

6 BACKGROUND

7 ONRR is required “to accurately determine oil and gas royalties,” 30 U.S.C. § 1711(a), and to
 8 “ensure the prompt and proper collection and disbursement of oil and gas revenues” owed to the United
 9 States, tribes, and the states, *id.* § 1701(b)(3). Royalty revenues collected by ONRR are divided
 10 between the federal government and the states where the mining takes place. *See* 30 U.S.C. § 191
 11 (explaining that royalties from onshore mining are divided evenly); *see also* 82 Fed. Reg. at 36,951
 12 (describing breakdown for different programs). Royalties are an important source of revenue for some
 13 states, which use the money to fund municipal budgets. *See* U.S. Dep’t of Interior, Fact Sheet: Federal
 14 Coal Royalties and their Impact on Western States (2013).⁶

15 Before ONRR issued the Valuation Rule, coal companies with mining or drilling leases on
 16 federal land were required to use a cumbersome “benchmarks” procedure to calculate the royalties
 17 owed on non-arm’s-length—or “captive”—sales, where a company sells minerals to one of its own
 18 subsidiaries or vice versa. *See* 81 Fed. Reg. at 43,338; *see also* Consolidated Federal Oil & Gas and
 19 Federal & Indian Coal Valuation Reform, Proposed Rule, 80 Fed. Reg. 608, 628 (Jan. 6, 2015). These
 20 benchmarks “were difficult to use in practice.” 81 Fed. Reg. at 43,354. For example, the first
 21 benchmark required lessees to use arm’s length prices from “comparable” sales, but pricing
 22 information from comparable sales is difficult to obtain because that information is considered
 23 proprietary. 81 Fed. Reg. at 43,354; *see also* 80 Fed. Reg. at 617, 628. As a result, it was difficult for
 24 ONRR to ensure that lessees paid royalties based on the fair market value of the minerals sold, rather

25
 26
 27
 28 ⁶ Website urls for all cited documents that are available online are provided in the table of authorities.

1 than on artificially low prices received in “captive” transactions. *See* 80 Fed. Reg. at 608, 616-7, 628.
 2 (See also AR 6750-6751 (public comments describing reports showing that captive transactions likely
 3 deprived ONRR of millions of dollars).)

4 Efforts to study and reform the royalty payment system in response to these and other concerns
 5 go back more than ten years. In 2007, after finding that the royalties paid for oil, gas, and coal mined
 6 on federal land were among the lowest in the world, the Government Accountability Office (“GAO”)
 7 called on the Department of Interior (“Interior”) to evaluate and update royalty procedures. U.S. Gov’t
 8 Accountability Office, GAO-07-676R, Oil and Gas Revenues (2007). Also in 2007, Interior appointed
 9 a Subcommittee on Royalty Management to address concerns about royalty payments. *See*
 10 Subcommittee on Royalty Management, Report to the Royalty Policy Committee on Mineral Revenue
 11 Collection from Federal and Indian Lands and the Outer Continental Shelf at vii (Dec. 17, 2007). The
 12 Subcommittee made several recommendations, including a recommendation that ONRR use market
 13 indices to value transactions rather than the benchmarks system. *Id.* at xvii.

14 Over the next several years, the GAO continued to call on Interior to reform royalty
 15 procedures.⁷ And, in 2013, the Office of the Inspector General at Interior similarly identified
 16 weaknesses in the payment system, which put Interior at risk of not receiving the full fair market value
 17 of its leases.⁸ Also in 2013, a bipartisan team of Senators called for an investigation and reform of any
 18 regulations that were “inadequate to ensure that full royalty value is returned.”⁹

19 In response to these calls for reform, Interior explained in 2013 that it had begun a process to
 20 review and consider improvements that “could dramatically improve compliance and reduce

22
 23
 24 ⁷ *See* U.S. Gov’t Accountability Office, GAO-15-39, Oil and Gas Resources: Interior’s
 25 Production Verification Efforts and Royalty Data Have Improved, but Further Actions Needed
 26 (2015); U.S. Gov’t Accountability Office, GAO-14-50, Actions Needed For Interior to Better Ensure
 27 A Fair Return (2013); U.S. Gov’t Accountability Office, GAO-08-691, The Federal System for
 28 Collecting Oil and Gas Revenues Needs Comprehensive Reassessment at 7-10 (2008).

⁸ U.S. Dep’t of the Interior, Office of the Inspector General, Evaluation: Coal Management
 Program at 1 (June 2013) (describing weaknesses in the coal valuation procedures).

⁹ Letter to Ken Salazar from Senators Lisa Murkowski and Ron Wyden (Jan. 2, 2013).

1 administrative costs for industry and the Government.”¹⁰ Three years later, after holding several public
 2 workshops, providing a lengthy comment period, and reviewing thousands of pages of public
 3 comments, ONRR issued the Valuation Rule. 81 Fed. Reg. at 43,338. In the Valuation Rule, ONRR
 4 sought to provide “greater simplicity, certainty, clarity, and consistency in product valuation for
 5 mineral lessees and mineral revenue recipients,” decrease “industry’s cost of compliance,” and ensure
 6 that “companies have paid every dollar due” to federal and state taxpayers. *Id.*¹¹

7 To serve these goals, ONRR did away with the antiquated benchmarks system and adopted a
 8 simpler approach that assessed royalties against the price obtained in the first *actual* arm’s length sale
 9 of the resource. 81 Fed. Reg. at 43,338-39; *see also* 80 Fed. Reg. at 609; States’ Br. at 6. The agency
 10 predicted that the Valuation Rule would have two primary effects. First, by simplifying the procedures
 11 for valuing federal mineral resources, the rule would decrease administrative costs by \$3.6 million per
 12 year. 81 Fed. Reg. at 43,359-60. *See also id.* at 43,339; 80 Fed Reg. at 608. Second, by making clear
 13 that companies are required to pay royalties based on the first arm’s length transaction and updating
 14 valuation procedures in several other ways, the rule was expected to increase royalty revenue for
 15 federal and state taxpayers by almost \$80 million per year. *See* 81 Fed. Reg. at 43,367.

16 In the Repeal Rule, ONRR turns its back on these long-awaited reforms. That reversal is
 17 arbitrary and capricious, both because ONRR fails to accurately assess the Repeal Rule’s economic
 18 impact and because ONRR fails to provide a reasoned explanation for the abrupt change in course.

20

21 ¹⁰ Letter to Chairman Wyden from Ken Salazar, Secretary of the Interior (Feb. 7, 2013).

22 ¹¹ The Department of Interior’s Fact Sheet, GAO reports, the Subcommittee report, and the
 23 Office of the Inspector General report are subject to judicial notice as “records and reports of
 24 administrative bodies.” *Interstate Nat. Gas Co. v. Southern California Gas Co.*, 209 F.2d 380, 385
 (9th Cir. 1953); *see also Roy v. County of Los Angeles*, 2018 WL 914773, at *15 (C.D. Cal. Feb. 7,
 2018) (taking judicial notice of GAO report among other records and reports).

25 In addition, the court may take judicial notice of the letter exchange between Senators
 26 Murkowski and Wyden and Secretary Salazar, as the letters are available on the Senate’s website, as
 27 provided in the table of authorities. *See Kao v. Abbott Laboratories Inc.*, 2017 WL 5257041, at *3
 (N.D. Cal. Nov. 13, 2017) (Tigar, D.J.) (taking judicial notice of guidance document and other
 28 documents on agency websites). For all of these documents, amicus is only requesting judicial notice
 of the fact that the reports and letters were published, “not of the truth of their content.” *Woodfin
 Suite Hotels, LLC v. City of Emeryville*, 2007 WL 81911, at *3 (N.D. Cal. 2007) (Armstrong, D.J.).

ARGUMENT

ONRR HAS NOT PROVIDED A REASoNED EXPLANATION FOR REPEALING THE VALUATION RULE

The Administrative Procedure Act (APA) requires ONRR to “examine the relevant data” and “articulate a satisfactory explanation for its action including a rational connection between the facts found and the choice made” when issuing any new regulation. *Motor Vehicle Mfrs. Ass’n v. State Farm Mut. Auto. Ins. Co.* (“State Farm”), 463 U.S. 29, 43 (1983) (internal quotation marks omitted). These principles apply to repeals just like they apply to new regulations. *Id.*; 5 U.S.C. § 551(5). Specifically, when an agency reverses course through a repeal, it must provide a “reasoned explanation” for dismissing the “facts and circumstances that underlay” the original rule. *F.C.C. v. Fox Television Stations*, 556 U.S. 502, 515-16 (2009).

In the Repeal Rule, ONRR fails to cite new information since the agency finalized the Valuation Rule to support its decision. Instead, ONRR cites “defects” in the Valuation Rule to justify reversal. 82 Fed. Reg. at 36,934. But that reversal is arbitrary and capricious because (1) ONRR fails to adequately assess the economic and environmental impacts of its action and (2) ONRR’s citation to “defects” is inadequate to justify the decision to deprive federal and state taxpayers of increased royalty revenue.

A. The Repeal Rule's Economic and Environmental Analysis Is Fundamentally Flawed

When an agency relies on an economic analysis to support its rulemaking, “a serious flaw undermining that analysis can render the rule unreasonable.” *Nat'l Ass'n of Home Builders v. EPA*, 682 F.3d 1032, 1040 (D.C. Cir. 2012). As part of the Repeal Rule, ONRR prepared an analysis of the repeal’s economic impacts. *See* 82 Fed. Reg. at 36,943. That analysis contains two fundamental errors, which render the Repeal Rule arbitrary and capricious.

1. ONRR Fails to Provide an Explanation for Forgoing the Valuation Rule's Benefits

The APA requires an agency to “examine the relevant data and articulate a satisfactory explanation for its action.” *See State Farm*, 463 U.S. at 43. Courts will reverse where an examination of the agency’s explanation makes clear that the agency failed to consider “an important aspect of the problem.” *Id.* One important factor in an agency decision is the cost that the decision imposes on

1 society. Executive Order 12,866, the main executive order that has governed regulatory decision-
 2 making since 1993 and continues to govern today,¹² instructs agencies to consider the costs of the
 3 decision, including “any adverse effects . . . on health, safety and the natural environment” when
 4 assessing a regulation’s costs. Exec. Order No. 12,866 § 6(a)(3)(C)(ii), 58 Fed. Reg. 51,735 (Sept. 30,
 5 1993) (“Executive Order 12,866”).¹³ And courts have consistently required agencies to take the costs
 6 of their actions into account. *Michigan v. EPA*, 135 S. Ct. 2699, 2707 (2015) (explaining that under
 7 42 U.S.C. § 7412, “[n]o regulation is ‘appropriate’ if it does significantly more harm than good”); *New*
 8 *York v. Reilly*, 969 F.2d 1147, 1153 (D.C. Cir. 1992) (remanding rule where agency failed to explain
 9 how economic benefits would justify forgoing promised air benefits); *Johnston v. Davis*, 698 F.2d
 10 1088, 1094-95 (10th Cir. 1983) (remanding an environmental study because it made “no mention” of
 11 a crucial factor that would make the action net costly).

12 In the context of a repeal, costs include the forgone benefits of the repealed rule. *See Michigan*,
 13 135 S. Ct. at 2707 (“[C]ost’ includes more than the expense of complying with regulations; any
 14 disadvantage could be termed a cost.”). Failure to consider those forgone benefits renders the rule
 15 arbitrary and capricious. *California*, 277 F. Supp. 3d at 1122 (holding that failure to consider forgone
 16 benefits was arbitrary and capricious); *cf. Nat’l Ass’n of Home Builders*, 682 F.3d at 1039 (finding
 17 that the agency properly calculated the costs of amending a regulation); *Mingo Logan Coal Co. v.*
 18 *EPA*, 829 F.3d 710, 730 (D.C. Cir. 2016) (Kavanaugh, J., dissenting) (Considering the costs of a repeal
 19 “is common sense and settled law.”).

20 ONRR did not adequately address the forgone benefits of the Repeal Rule. The Valuation Rule
 21 was expected to generate annual net benefits of \$3.6 million, in the form of administrative costs
 22

23

24

25 ¹² See Office of Mgmt. & Budget, Memorandum: Implementing Executive Order 13,771,
 26 Titled “Reducing Regulation and Controlling Regulatory Costs” pt. II (Apr. 5, 2017) (“EO 12866
 remains the primary governing EO regarding regulatory planning and review.”).

27 ¹³ Citation to extra-record information is appropriate to explain “technical terms or complex
 28 subject matter.” *S.W. Ctr. For Biological Diversity v. U.S. Forest Serv.*, 100 F.3d 1443, 1450 (9th
 Cir. 1996).

1 savings resulting from its simpler calculation methods. 81 Fed. Reg. at 43,360. And repealing the rule
 2 imposed annual net costs by forgoing those administrative cost savings. In the Repeal Rule, ONRR
 3 concedes that the repeal will impose “additional administrative costs” because it will forgo the
 4 Valuation Rule’s administrative cost savings.¹⁴ *See* 82 Fed. Reg. 36,946. But ONRR does not
 5 acknowledge that the repeal results in *net* costs. Neither does it attempt to justify this result. Instead,
 6 ONRR attempts to obscure the effect of its decision by pointing to the royalty payments that industry
 7 would no longer be making and asserting that repeal would result “in an overall savings to the
 8 industry.” 82 Fed. Reg. at 36,951-52; *see also id.* at 36,944 (showing increases in administrative costs
 9 in a chart alongside decreases in royalty payments).

10 But the appropriate question for ONRR in its cost-benefit analysis, is not whether *industry* will
 11 be better off as a result of the Repeal Rule, but whether *society* will be better off. *See* Exec. Order No.
 12 12,866 § 1(b)(11) (“Each agency shall tailor its regulation to impose the least burden *on society* . . .”
 13 (emphasis added)).¹⁵ From the perspective of society, changes in royalty payments are neither a cost
 14 nor a benefit of the rule, but a transfer from industry to federal and state taxpayers, with distributional
 15 impacts. *See* Office of Management and Budget, Circular A-4 at 14, 38 (2003)¹⁶ (explaining that
 16 “monetary payments from one group to another . . . do not affect total resources available to society”).
 17 In other words, any savings for industry from royalty payments are entirely offset by losses to federal
 18 and state governments from decreased royalty revenue, which would have been used to fund important
 19

20

21 ¹⁴ The forgone cost savings in the Repeal Rule are higher than the administrative cost savings
 22 in the Valuation Rule. The difference stems from ONRR’s use of updated Bureau of Labor Statistics
 23 for hourly wages and inclusion of certain additional categories of forgone savings in the Repeal
 24 Rule, which had not been included as cost savings in the Valuation Rule. *See* 82 Fed. Reg. at 36,948.

25 ¹⁵ *See also* EPA, Guidelines for Preparing Economic Analyses at A-6 (“[Cost-benefit
 26 analysis] can be thought of as an accounting framework of the overall social welfare of a
 27 program . . .”); Caroline Cecot & Kip Viscusi, *Judicial Review of Agency Cost-Benefit Analysis*, 22
 28 Geo. Mason L. Rev. 575, 580 (2015) (“[I]f the agency is guided by [cost-benefit analysis], it may
 only promulgate the rule if society, on net, would benefit from the rule.”).

¹⁶ Circular A-4 was originally issued under President George W. Bush and the current
 administration has instructed agencies to follow it. Office of Mgmt. & Budget, Memorandum:
 Implementing Executive Order 13,771, Titled “Reducing Regulation and Controlling Regulatory
 Costs” (Apr. 5, 2017).

1 municipal projects. Thus changes in industry's royalty payments cannot offset the additional costs.

2 ONRR's myopic focus on the effect that the Repeal Rule will have on industry is a fundamental
 3 error that caused the agency to ignore the duty to explain why the imposition of forgone benefits is
 4 justified. ONRR is not permitted to "put a thumb on the scale" by emphasizing the benefits to industry
 5 to achieve a desired objective. *Ctr. for Biological Diversity v. Nat'l Highway Traffic Safety Admin.*,
 6 538 F.3d 1172, 1198 (9th Cir. 2008); *see also Pub. Citizen, Inc. v. Mineta*, 340 F.3d 39, 58 (2d Cir.
 7 2003) (holding that a rule "that does not explain why the costs saved were worth the benefits
 8 sacrificed" is arbitrary and capricious"). Because ONRR ignores its obligation to explain the decision
 9 to forgo the benefits of the Valuation Rule, the Repeal Rule must be vacated as arbitrary and
 10 capricious. *See State Farm*, 463 U.S. at 43.

11 **2. ONRR Ignores the Health and Environmental Consequences of Increased
 12 Production**

13 ONRR's analysis of the Repeal Rule's impact on mineral production is also fundamentally
 14 flawed. Contrary to previous conclusions and without any supporting data, ONRR claims that the
 15 Valuation Rule would have "unnecessarily obstructed, delayed, curtailed, or otherwise imposed
 16 significant costs on the production, utilization, or delivery" of oil, gas, and coal. 82 Fed. Reg. at
 17 36,939; *see also id.* at 36,937–38. As plaintiffs explain, this claim contradicts ONRR's prior
 18 conclusion in the Valuation Rule that the reform would not "alter, in any material way, natural
 19 resources exploration, production, or transportation." 81 Fed. Reg. at 43,368; *See also* States' Br. at
 20 19; Conservation Group's Br. at 14. Indeed, elsewhere in the Repeal Rule itself, ONRR contradicts
 21 the claim, asserting that "[t]he procedural changes resulting from the repeal of the 2017 Valuation
 22 Rule will have no consequence on the physical environment" and that the repeal will not "alter in any
 23 material way, natural resources exploration, production, or transportation." 82 Fed. Reg. at 36,593.
 24 That inconsistency alone is a reason to find the Repeal Rule arbitrary and capricious. *Nat'l Cable &*
 25 *Telecomm. Ass'n v. Brand X Internet Servs.*, 545 U.S. 967, 981 (2005) (an unexplained inconsistency
 26 is "a reason for holding an interpretation to be an arbitrary and capricious change"); *Gen. Chem. Corp.*
 27 *v. United States*, 817 F.2d 844, 857 (D.C. Cir. 1987) (finding the agency's action arbitrary and
 28 capricious due to the internal inconsistencies in the agency's reasoning).

In any event, if ONRR is correct that the Valuation Rule would have led to decreased

1 production, then it follows that the Repeal Rule will *increase* production and ONRR should have
 2 addressed this issue. As ONRR’s analysis of the “royalty impacts” concedes, the appropriate baseline
 3 for analysis is a world in which the Valuation Rule is in effect. *See* 82 Fed. Reg. at 36,944, 36,951
 4 (showing forgone royalty payments of the Valuation Rule); *see also* Circular A-4 at 15, 18 (The
 5 baseline is meant to be an accurate description of the world, absent the rule at issue.). Because the
 6 Repeal Rule removes the impact of the Valuation Rule, then the Repeal Rule would—assuming ONRR
 7 is right about the Valuation Rule’s impact on production—increase production relative to the baseline.

8 That increase would, in turn, cause health and environmental harms, which ONRR was
 9 required to take into account when assessing the rule’s costs and benefits. *See State Farm*, 463 U.S. at
 10 43 (agencies must consider “important aspects of the problem”); *Balt. Gas & Elec. Co. v. Natural Res.*
 11 *Def. Council, Inc.*, 462 U.S. 87, 96 (1983) (explaining that under the National Environmental Policy
 12 Act, agencies must “consider and disclose the actual environmental effects” of foreseeable increases
 13 in production in a way that “brings those effects to bear” on the decision).

14 Mineral production and exploration cause numerous environmental impacts, varying with the
 15 amount, location, and nature of the minerals developed, among other factors. For example, basic
 16 economic principles of supply and demand provide that any significant increase in mineral production
 17 and supply will decrease the price of the mineral resources, and that lower prices give rise to increased
 18 consumption. *See WildEarth Guardians*, 870 F.3d at 1235 (holding that the agency’s assumption that
 19 new coal leases would not increase the overall level of coal mining was arbitrary and capricious); *Mid*
 20 *States Coal. for Progress v. Surface Transp. Bd.*, 345 F.3d 520, 549 (8th Cir. 2003) (“[T]he increased
 21 availability of inexpensive coal will at the very least make coal a more attractive option to future
 22 entrants into the utilities market.”). Changes in consumption, in turn, can result in changes to
 23 associated emissions. *See, e.g., Montana Envtl. Info. Ctr. v. U.S. Office of Surface Mining*, 274 F.
 24 Supp. 3d 1074, 1103-04 (D. Mont. 2017). Thus, if repealing the Valuation Rule will, as ONRR claims,
 25 increase production, then it would also impose health and environmental costs, many of which are
 26 quantifiable. *See Center for Biological Diversity*, 538 F.3d at 1200 (holding that agency’s failure to
 27 quantify benefits of energy conservation was arbitrary and capricious). ONRR’s failure to assess these
 28 costs and justify their imposition is arbitrary and capricious.

B. ONRR's Justification for Issuing the Repeal Rule Is Arbitrary and Capricious

1. ONRR's Claim that Repealing and Replacing the Valuation Rule Is Less Costly than Correcting the "Defects" Is Unsupported

In addition to performing an inadequate cost-benefit analysis, ONRR’s justification for forgoing royalty payments to the federal government and states is also flawed. ONRR issued the Valuation Rule in order to “provide early certainty to industry and to ONRR that companies have paid every dollar due” for resources extracted from public lands. 81 Fed. Reg. at 43,338. The Valuation Rule’s updates were expected to increase industry payments by almost \$80 million per year. 81 Fed. Reg. at 43,360. By repealing the Valuation Rule, ONRR deprives the federal government and states of those additional payments. That loss will be felt particularly hard by the affected states, which stand to lose significant funding for schools, road construction, and municipal budgets.¹⁷ See 82 Fed. Reg. at 36,951 (showing that repeal causes losses to states of more than \$15 million per year).

In the Repeal Rule, ONRR does not address at all how or why it is justified in depriving the states and federal government of those payments or cite any new evidence. Instead, ONRR points to scattered “defects” in the Valuation Rule and asserts—in a conclusory fashion—that “[t]he cost of implementing the rule and subsequently trying to fix the defects in one or more separate rulemakings would far exceed the cost of repealing and replacing the rule.” 82 Fed. Reg. at 36,940; *see also id.* at 36,934. But none of the “defects” ONRR cites appear costly to fix. Indeed, it is possible they could have been fixed either through guidance or an amendment. For example, ONRR claims that the Valuation Rule would have caused confusion because it instructed lessees to value coal based on the gross proceeds that accrue to “you,” rather than “you and affiliates.” 82 Fed. Reg. at 36,936. The implication of ONRR’s claim is that the agency had been trying to make clear that companies should pay royalties based on the value of the minerals when sold at arm’s length, whether that value was obtained by the mining company or an affiliate, and the word “you” alone could cause uncertainty as to whether lessees are required to pay royalties on arm’s length proceeds that accrue to affiliates.

¹⁷ See U.S. Dep’t of Interior, *Fact Sheet: Federal Coal Royalties and their Impact on Western States* (2013).

1 But there is no uncertainty on this point. The text of the Valuation Rule as a whole made clear
2 that royalties must be paid on gross proceeds, whether they accrue to an affiliate or a lessee. *See* 81
3 Fed. Reg. at 43,390, 43,396. ONRR has not explained why what was at most a minor drafting error
4 could not be solved by guidance or a simple amendment, rather than a full repeal. *See Pub. Citizen v.*
5 *Steed*, 733 F.2d 93, 102 (D.C. Cir. 1984) (explaining that suspending a rule without adopting available
6 alternatives was arbitrary and capricious).

7 Similarly, ONRR claims that the “default provision” in the Valuation Rule “created more
8 confusion and uncertainty than it resolved,” 82 Fed. Reg. at 36,937, but the agency offers no evidence
9 to support that assertion. As ONRR explained in the Valuation Rule, the default provision would allow
10 ONRR to establish the fair-market value for a transaction “only in very specific cases” where
11 circumstances such as the lessee’s misconduct or failure to provide documents render the agency
12 unable to “reasonably determine the correct value of production.” 81 Fed. Reg. at 43,341. Moreover,
13 the “default provision” did not “alter the underlying principles of the previous regulations.” *Id.* The
14 statutes governing royalty payments always gave ONRR “the authority and considerable discretion to
15 establish the reasonable value of production by using a variety of discretionary factors and any other
16 information that the Secretary determines is relevant.” *Id.* In adding the default provision, ONRR was
17 seeking to add clarity and consistency to that exercise of discretion by specifically enumerating “when,
18 where, and how the Secretary will use that discretion.” *Id.* On repeal, ONRR cites no new evidence
19 that would support a conclusion that the default provision was not advisable. As ONRR’s previous
20 analysis shows, the default provision makes the exercise of discretion more predictable—not more
21 confusing and uncertain. ONRR’s conclusory assertions about the need to repeal the Valuation Rule
22 are insufficient to show that “there are good reasons for the new policy.” *Fox Television Stations, Inc.*,
23 556 U.S. at 515; *see also NetCoalition v. SEC*, 615 F.3d 525, 539 (D.C. Cir. 2013) (holding that the
24 court would not “defer to the agency’s conclusory or unsupported suppositions” (internal quotation
25 marks omitted)).

2. The Court Should Reject ONRR's Attempt to Justify the Repeal Rule Through Reliance on ONRR's Illegal Suspension of the Valuation Rule

A further, overarching problem with ONRR’s attempt to justify the Repeal Rule is that it relies heavily on uncertainty as to how the Valuation Rule will be implemented—uncertainty that exists at least in part due to ONRR’s own illegal actions. The Valuation Rule became effective in January 2017, 81 Fed Reg. at 43,338, and lessees were scheduled to begin paying royalties under the Valuation Rule’s new procedures in February 2017, *see* 82 Fed. Reg. 11,823 (Feb. 27, 2017). But ONRR delayed the rule’s effective date before those first payments could be made, 81 Fed. Reg. at 11,823.

A federal court has since found that the delay was illegal. *See Becerra v. U.S. Dep’t of Interior*, 276 F. Supp. 3d 953, 967 (N.D. Cal. 2017) (Laporte, M.J.). Notwithstanding that finding, on repeal, ONRR relies on the fact that the rule has not yet been implemented to justify the repeal. For example, ONRR claims that “several unforeseen defects in the 2017 Valuation Rule have the potential to significantly increase the cost and administrative burden of compliance, which *could* create a disincentive to enter [] into . . . leases.” 82 Fed. Reg. at 36,939 (emphasis added). ONRR also contends that the Valuation Rule’s requirement for contracts to be written for purposes of royalty valuation is “potentially costly” and “*could* increase the cost of production and delay the delivery of mineral resources.” 82 Fed. Reg. at 36,937 (emphasis added).

As explained earlier, those statements are contradicted by ONRR’s original findings that the Valuation Rule would decrease administrative costs and would not affect production. 81 Fed. Reg. at 43,360, 43,368. Additionally, agencies should not be given a “free pass . . . to exceed their statutory authority and ignore their legal obligations under the APA.” *California*, 277 F. Supp. 3d at 1126. Had ONRR not illegally delayed the Valuation Rule’s implementation, ONRR would have known at least something about whether those “potentially” costly problems were indeed occurring. Allowing ONRR to cite implementation-related uncertainty—uncertainty that exists at least in part due to the agency’s illegal action—would improperly reward the agency for its bad behavior. The court should put “the parties in the positions they would have been in if the APA had not been violated,” *Nat. Res. Defense Council, Inc. v. EPA.*, 683 F.2d 752, 768 (3d Cir. 1982), and reject ONRR’s attempt to justify the Repeal Rule by citing implementation-related uncertainty.

CONCLUSION

This Court should grant plaintiffs' motion for summary judgment, vacate the Repeal Rule, and reinstate the original compliance dates in the Valuation Rule.¹⁸
